Anar Labs

Anar Present

From a prompt to slides.

Anar Present writes a PPTX deck from a text prompt, with speaker notes, in English or Arabic.

For
Communications, strategy and PMO teams

Date
November 2026

The problem

Each briefing deck starts from an empty file.

01

A blank file every time

Staff build each briefing deck from an empty file.

02

Arabic needs manual fixes

Staff fix the direction and alignment of Arabic text by hand.

03

Decks do not match

Each team uses its own layout. Decks do not follow one house style.

What it is

Describe the deck. Get a PPTX file.

01

Your prompt

Describe the deck. Choose English or Arabic and up to 30 slides.

→

02

Anar Present

Your model writes titles, bullets and speaker notes. Present builds the slides.

→

03

Your deck

Edit one slide by instruction. Export the deck as PPTX or PDF.

Anar supplies no models. Present uses the model you configure, directly or through Anar Gateway.

Writing

Present drafts the deck and the notes.

Five layouts

Title, title and content, two columns, section header and blank.

Shipped

Speaker notes

Each slide gets notes for the presenter.

Shipped

Edit by instruction

Tell the model what to change on one slide. Present rewrites that slide only.

Shipped

Deck management

Reorder, clone, duplicate and delete slides and decks.

Shipped

Shipped Partial Roadmap

Arabic and export

English export works. Arabic export has limits.

Arabic in PPTX

Arabic paragraphs run right to left. No typeface is set, so the font depends on the viewer.

Partial

PDF export

English PDF works. Arabic PDF does not show Arabic letters yet.

Partial

Themed export

Export with a built-in theme. The theme rebuilds slides from text, so images and tables are lost.

Shipped

Shipped Partial Roadmap

Use your own template. Collect comments.

Your template

Admins upload a PPTX template. Present generates new decks from it. No templates come with the product.

Partial

Shipped Partial Roadmap

Comments

Reviewers leave comments on each slide. There are no threads or notifications.

Shipped

Co-editing and versions

Real-time co-editing and version history are not built.

Roadmap

Status today

What works now, and what does not yet.

Capability	Status	Note
Prompt to deck, notes, layouts	Shipped	English and Arabic. Up to 30 slides.
Edit by instruction, comments	Shipped	Comments have no threads.
Arabic in PPTX	Partial	Right-to-left text. No typeface set.
PDF export	Partial	English only today.
Templates	Partial	Upload your own. None come with the product.
Charts, co-editing, version history	Roadmap	Not built yet.

Roadmap

Arabic output comes first.

Now

- Prompt to deck
- Edit by instruction
- PPTX export

Next

Roadmap

- Arabic fonts with shaping in PDF
- A typeface set on every slide
- Charts and tables from your data

Later

Roadmap

- Accessible PPTX
- Brand and classification checks
- Disclosure of AI-written content

The platform

Present works with the Anar platform.

Anar Gateway

Present can send its model calls through the gateway when you set its address.

Anar Guard

Present sends an event to Guard for each model call.

MCP clients

An agent can call the Present API through its MCP server.

Draft your next briefing with us.

A one-month pilot: we deploy in your environment and run it with one team.
