Anar Labs

Anar Procure

Score every bid the same.

Anar Procure keeps tenders, suppliers and bids in one register, and scores each bid with one weighted formula that you can check.

For
Procurement departments and tender committees

Date
November 2026

The problem

Each evaluator scores bids in a different way.

01

Scores in spreadsheets

Each evaluator keeps a spreadsheet. The formulas change from one tender to the next.

02

Supplier data in many files

Supplier records sit in many files. Nobody has one list.

03

Rankings are hard to explain

A committee must explain a ranking. Scores made by hand are hard to check.

What it is

One formula ranks the bids. The committee decides.

01

Tender

Register the tender, its requirements and its weights.

→

02

Anar Procure

Scores each bid with a fixed formula and ranks the bids. Your model adds commentary.

→

03

Your committee

Reviews the ranking and the report, and decides the award.

The score comes from a formula, not from a model. Anar supplies no models. Your model writes commentary only.

Scoring

The same formula scores every bid.

5

criteria in the formula: price, technical, delivery, past performance and certifications.

Count from the product source, November 2026.

- **Price:** the lowest price scores highest. Other bids score by their ratio to it.
- **Technical:** requirements matched against supplier qualifications. Proposal length adds up to 20 points.
- **Other criteria** get a weight but no score. Use the five criteria only.

Formula Technical score

Register

Tenders, suppliers and bids in one place.

Tenders

Six statuses, from draft to awarded, closed or cancelled.

Shipped

Suppliers

One supplier list. Search suppliers and compare them.

Shipped

Bids

Submit and cancel bids. Compare bids by price rank.

Shipped

Supplier history

Win rate and delivery history come from data that staff enter.

Partial

Shipped Partial Roadmap

Analysis and reports

Your model comments. The formula decides the score.

Tender analysis

Your model notes risks and suggests weights. If the call fails, the text asks for manual review.

Shipped

Bid commentary

Your model lists strengths and weaknesses. The commentary does not change the score.

Shipped

Reports

JSON and PDF reports with a recommendation. Arabic PDF output is not complete.

Partial

Docs link

Procure sends the tender description to Anar Docs to list the requirements.

Partial

Shipped Partial Roadmap

Status today

What works now, and what does not yet.

Capability	Status	Note
Tender, supplier and bid register	Shipped	Six tender statuses.
Weighted scoring and ranking	Shipped	Five fixed criteria.
Model commentary	Shipped	Advice only. It does not change the score.
Reports, Docs link, roles	Partial	Arabic PDF output is not complete. One admin role.
Sealed bids	Roadmap	Today any signed-in user can read bid prices.
Audit trail, recorded award decision	Roadmap	Use the ranking as advice only.

Roadmap

The order follows what a lawful award needs.

Now

- Tender, supplier and bid register
- Weighted scoring and ranking
- Reports

Next

Roadmap

- Two-envelope evaluation
- Sealed bids until the deadline
- Ranking as advice, with a recorded human award decision

Later

Roadmap

- Append-only audit trail as an award file
- Local content gate
- Supplier screening with Arabic name matching
- OCDS export

The platform

Procure works with the Anar platform.

Anar Docs

Procure can send tender text to Docs to list requirements. Set the Docs address.

Anar Gateway

Procure can send its model calls through the gateway when you set its address.

Anar Guard

Procure sends an event to Guard for each model call.
